Stand By
Technical Data Sheet

emmegi®

Description

The Stand By sofa has a distinctive look that is perfect for open-plan spaces, offering a wonderfully calm, private space for exchanging information, making calls and preparing documents. Stand By can be arranged in different configurations tailored to individual needs and can be complemented with accessories such as tables for setting down your laptop.

The collection includes single-seater armchairs and 2-seater sofa options as well as a version with side and rear panels that can be used to create private work or meeting booths, providing an excellent acoustic and visual barrier. The structure can be produced all in the same colour or in a combination of colours.

Frame

4-leg frame made from tubular steel measuring 20 x 20 x 1.5 mm thick with reinforcing cross pieces made from tubular steel measuring 50 x 20 x 1.5 mm thick in chrome finish or black or white coating.

Seat and backrest

Seat, back and armrest feature internal structure made from 18mm-thick plywood panels fastened to the iron frame with corner brackets made from 3mm-thick steel suitably ribbed for strength.

Fire-retardant CFC-free flexible polyurethane padding, 40 kg/m3 density, with Cl. 1 reaction to fire rating.

Fabric or imitation leather upholstery can be produced all in the same colour or in a combination of two.

### Version with panels

Panels come in two types:
- version with wall-mounted panels
- version with floorstanding panels, on sofa with no armrests.

The internal structure is made from self-supporting steel with Cl. 1 fire-retardant cold-moulded polyurethane resin foam, 70 kg/m3 density, 50mm thick, covered with thin padding and upholstered in fabric.

With their use of EUROPOST 2®, a special sound-absorbing covering, the enclosing panels ensure a high level of privacy and effectively screen out noises.
