

**FOCUS DIVIDER**  
Room Divider  
By Tengbom

## FACTS

# OFFECCT

### PRODUCT INFORMATION

When walls disappear and office spaces are opened up, the need to be able to create a room within a room increase. Focus Divider is a new item of furniture that enables this. It is a temporary resort for undisturbed and focused work.

"The thought was to create a space in the office that would offer you peace and quiet for uninterrupted work. Focus Divider is a natural complement to the rest of the office interior and signals at the same time that you want to work in peace", says Kristina Jonasson, Tengbom.

"We didn't want Focus Divider to be too secluded and so we designed a window in the structure to stop you from feeling shut off from the rest of the office", continues Daniel Lavonius Jarefeldt, Tengbom.
