

**CLOUD**  
Room Divider  
By Monica Förster

## FACTS

# OFFECCT

### PRODUCT INFORMATION

Cloud is designed by Monica Förster and is the portable room for meeting, resting and concentrating, a room that is easy to transport from place to place in a normal sized sports bag. The idea behind Cloud is the feeling to be among clouds. In order to capture this feeling a transparent material resistant to air has been used. The design of Cloud uses a minimum of material and generates a minimum of wastes. Cloud uses air as the carrying material. From the moment the fan is turned on it takes about four minutes for the room to be inflated and usable. The quiet fan keeps Cloud inflated for as long as needed.

### TECHNICAL INFORMATION

Cloud is made of nylon fabric. Inflatable meeting room incl. electric fan and transport bag. Not recommended for outdoor use.
