Hello again! We are Extremis. We love 'stoverij' – a beef stew with beer – and French... um, Belgian fries.

We're promoting a Burgundian yet responsible lifestyle. Belgium is known as the land of culinary treats. At Extremis, we choose quality when it comes to food, and frankly, we should all do the same when we buy furniture as well.

Belgian fries? It is rumoured that 'French fries' received their name during World War One. At that time, English speaking soldiers were introduced to the fried potatoes in French-speaking Belgium, but because they thought they were in France, they labelled them 'French'.

This is our very first Gargantua, made in 1994
(note the traces of wear).

This is a **Gameboy**
from the same decade.
Only nostalgia is left.

Back to
index

At Extremis, design has always
been about the whole cake.

Our many ecology awards
prove we're concerned about
the world we live in.

Plenty of design awards
certify the originality of our
designs.

More, management awards
say something about our
ethical enterprise.

Three trophies are displayed on a light-colored shelf against a dark blue background. The largest trophy on the left has a silver globe on top of a tall, faceted, reddish-brown stem, which sits on a white marble base. In the center is a smaller, silver, leaf-shaped trophy with a circular emblem in the center, also on a white marble base. To the right is another trophy with a silver cup on top of a gold stem, which sits on a white marble base. A dark rectangular block is positioned between the two smaller trophies.

But in the end, we only seek recognition
from you, our customers.

[Back to
index](#)

Why on earth?

Why do we build new products? Is it just for the sake of launching a new product? Or is there a deeper rationale? At Extremis, we only start developing an idea if it is both necessary and useful. If it offers a solution. And makes you look at things differently. That is our absolute starting point.

Immortal ideas

From that point on, we take the Idea on a journey to create the best possible impact. Only the strongest ideas have the ability to ripple outward and span decades, not years. We aim to inspire the future by changing today's way of thinking.

Lasting materials

To maximize that impact, we employ only the highest quality materials and cutting-edge processes. To construct strong and durable products that sling that one, foundational idea into the future.

Carefully designed

The best way to make a product last, however, is to make it beautiful. In every aspect. To inspire both care and enjoyment. And become a focal point of the memories and experiences that make life itself truly beautiful.

With positive impact

That is the impact we strive to create. By transforming radical ideas into game-changing designs. Designs that are not only useful, durable and beautiful in themselves but also have the power to spark meaningful connections and enhance the way we interact with one another. A necessary condition for every Extremis design and the traces it leaves behind.

We strive to create ideas that are loved for their personality, embraced for their quality, and cherished for their impact, as true tools for togetherness.

index

Gargantua

DESIGN BY DIRK WYNANTS

According to an American study, parents and children currently only spend an average of 15 minutes together per day. To improve the quality of this togetherness, Dirk Wynants wanted to create a table where children could comfortably sit at the same height as the adults. This was to enable better communication.

Gargantua

The Gargantua table offers superior functionality thanks to its adjustable benches that can change in height depending on your social or family needs. There is a level for adults, for bigger and smaller children, or the bench can be used as an extension

of the tabletop. Provides space for 8 - 12 people. If one bench is removed, people in wheelchairs can also join the table. Gargantua is also ideal for urban spaces and project environments.

AZ Jan Palfijn, Ghent.

←
Castle 'De Blankaart',
Diksmuide.

Inumbra

Inumbra is unique because of his pure aesthetics. Easy to open and close: the parasol opens and closes with a separate handle. All technical parts that open and close the screen are above the Inumbra's UV resistant fabric, which means they are not visible when seated under the parasol. Inumbra

has been submitted to wind-tunnel testing at the Von Karman Institute. Although the parasol can withstand wind speeds of up to 8 on the Beaufort scale, it is off course advisable to close it sooner (from wind speed 6 as a rule of thumb).

Inumbra

Inumbrina

The major difference between Inumbra and Inumbrina lies in how they are operated. When converting to a thinner and lighter central pole, the challenge was to replace the handle and

spindle system. Our technical team came up with an ingenious pulley and rope system. Opening and closing the parasol with a rope turns out to be really easy, and even faster!

Pantagrue

DESIGN BY DIRK WYNANTS

Pantagrue is a chip off the old block. He's robust, elegant and sober, just like his father Gargantua, designed 20 years earlier. Together they are the most famous giants in European literature. Francois Rabelais describes them as large, strong, high-spirited, intelligent, progressive and crazy about the good things in life.

Pantagruel

When we started Extremis 20 years ago, we named our first piece Gargantua. It was based on a famous 16th-century series of novels by a French monk, Rabelais, describing the life of two giants: Gargantua - whose appetite was unstoppable -

and his son Pantagruel. The second generation, Pantagruel, is not a better version of Gargantua, he's just different. There are several material options for the frame, fixed benches and tabletop. It also features a Lazy Susan to easily pass dishes around.

Romeo & Juliet

DESIGN BY KOEN BAEYENS, STIJN GOETHALS
& BASILE GRAUX

Romeo & Juliet adds some green to an often colourless urban or industrial setting. The bench is made of long, rectangular strips of wood. Two holes in the seat create room for large flowerpots.

Extremis

Back to
index

↑
Romeo & Juliet in a row
Tapiola / Finland.

→
Ledegem / Belgium.

Romeo & Juliet

Romeo & Juliet offers passers-by a comfortable place to sit and relax and also adds a touch of green to an otherwise drab urban or industrial setting. Two round holes in the seat create room for large flowerpots, perfect for a small tree or a plant of your choice. Just like Romeo and Juliet, the trees are destined to be together without ever being able to

touch. The bench seems to float between the trees. Obviously, Romeo & Juliet lends itself perfectly to the contract market: when several benches are put in line, the distance between the trees remains identical, creating architectural harmony. They are of course perfectly suited to private gardens or patios as well.

Hopper

Hopper clearly bears resemblance to the traditional picnic tables everybody knows, but as is typical of Extremis it offers extra comfort. The four pass-through zones make it easy to get in and out of Hopper without having to lift your leg over the bench

or disturb your table companions. Its slanted legs and tabletop edges are a clear reference to the hop poles that are so characteristic of the Westhoek region. If you turn around, you can use the tabletop as a comfortable backrest.

Hopper shade

DESIGN BY DIRK WYNANTS

Extremis' headquarters are based in the only hops region in Belgium, so the hop gardens that dominate the landscape inspired us to design Hopper shade. The slanted poles of the Hopper canopy withstand a lot of stress, just like the poles of a hops garden do.

Extremis

Back to
index

Restaurant Va & Vient,
Kortrijk.

leper / Belgium.

Hopper shade

Whether open or closed, Hopper Shade perfectly follows the lines of the Hopper table. It opens and closes without any effort, thanks to a spring mechanism inside. And above all, it does not take up extra space next to the table. The goal was to create enough shade for everyone in a simple and aesthetically pleasing way. Dirk Wynants found the

solution in the Hopper canopy. The cloth only has to be closed during strong winds, and then it rolls itself up. The materials used - stainless steel and hi-tech polyester fabric - are highly durable.

Picnik

DESIGN BY DIRK WYNANTS & XAVIER LUST

Let's celebrate Picnik in 2017!
Exactly 15 years ago, the launch of this design elevated a simple 'tête à tête' to an extremely romantic or even philosophical converse. Picnik became a real design classic, thanks to its iconic shape.

Back to
index

↑
Standard hotel
New York / USA.

Kosmos

Kosmos has a round shape for more intense conversations and cosier cuddling at night. At its lowest position, the optional adjustable table offers a completely flat surface, transforming Kosmos into

a giant lounger. This multi-purpose set takes you right through the day - from breakfast to sunbathing - without stuffing your roof terrace full of furniture.

Kosmos Parasol

DESIGN BY DIRK WYNANTS

We wanted to devise an umbrella that did not stand in the way when it was closed. The original (and patented) innovation is that it simply opens and closes horizontally like a fan... Or a bird's wings. Design by nature!

Kosmos parasol

Kosmos parasol is an ingenious design that opens horizontally like a fan, offering excellent wind resistance (wind force 6 on the Beaufort scale). It hangs low enough to provide lots of shade, and is perfect for placing next to the Kosmos table and seat

combination or any other furniture. Hidden magnets keep the parasol open. In very windy weather, the magnets will release their grip and the parasol will close automatically.

Sol+Luna

Sol+Luna is a two in one piece: furniture that has a function by day and by night. The perfect way to make optimal use of your patio. The Sol+Luna range is in two versions. The southern version, Australis, is clean and architectural, whereas the northern

version, Borealis, has a somewhat more organic look. Depending on the surroundings where the furniture will be placed, you can choose the finish that suits you best.

Icecube

DESIGN BY DANNY VENLET

Hosting a garden party? Icecube prevents your guests raiding the fridge or soiling the whole house. Self-service all night long! And the cool lighting effects get everyone in a party mood...

Icecube

This drink cooler adds the perfect finishing touch to any party, whether indoors or outdoors. Icecube does not only chill the drinks and keep them within reach; its optional lighting unit also creates the perfect party atmosphere. Hosts don't have to wait on their guests or put up with people coming into their kitchen and raiding their fridge. And the cool

lighting effects get everyone in a party mood... Icecube does not contain any cooling elements: Its double wall acts as an insulator. To fill Icecube completely you need 25 kg of ice. Icecube is made mainly of rotationally moulded polyethylene (PE), which is 100% recyclable.

Qrater

DESIGN BY DIRK WYNANTS

Modern living has almost become a bit too comfortable. The higher our standards of living and luxury, the more we long for the basics, the simple things in life. Let us present to you: the Television Of The Jungle!

Extremis

Qrater

Qrater is a campfire dish made of weathering steel, a type of steel that can be used in the garden as well as in open spaces. It only rusts on the surface, leaving the rest of the material intact. This means Qrater can stay outdoors all year round. A small hole

in the middle allows drainage of rain water or ashes into a smaller dish integrated into the galvanised steel pedestal. This pedestal also prevents heat damage to the surface below Qrater, as there is no direct contact between the dish and the ground.

Woodstock

DESIGN BY DIRK WYNANTS

Woodstock is the perfect addition to your Qrater firepit or fireplace. Frame the wood logs with the Woodstock rack and transport them easily wherever you need. The cart is also capable of supplying the beers once the Qrater is lit...

Woodstock and
Qrater are the perfect
combination.

←
Store your wood indoors.

Woodstock

Woodstock consists of a firewood rack and matching cart. You can fill the rack with a considerable number of logs and then transport them effortlessly to wherever you want. The rack keeps the logs stacked neatly and attractively right where you need them, perfectly combining beauty and functionality. Woodstock is not only about great

functionality. Like most other Extremis products, it also offers great environmental efficiency. As the cart is made of the leftovers from the rack, hardly anything goes to waste. Furthermore, a smart packaging design ensures a very compact transport volume. Woodstock can hold 1.18 m³ of wood if you use 30 cm logs.
